

ACI COMPLIANCE GATEWAY

The ACI Gateway is your inside network for those mandated to use the Indirect Air Carrier Standard Security Program (IACSSP). The ACI Gateway provides a management tool for the air freight industry participating in IACSSP. Our platform makes the burden of TSA compliance more manageable.

Welcome to The ACI Compliance Gateway, an easy to use system for maintaining and exchanging TSA compliance information.

Indirect Air Carriers—ACCESS CARRIERS INFORMATION FOR TSA COMPLIANCE

Authorized Representatives—connect with IACs you want to do business with

SAVE TIME AND STREAMLINE THE PROCESS

The ACI Gateway provides a simple dashboard for the purpose of sharing TSA and other company data with companies you connect with. The system eliminates hours of double entry and emailing files. It is secure and the data is backed up to our dedicated server.

With the Gateway, you can store your employee TSA compliance records and share them with companies you connect with. From the employee module, you may email password protected electronic exams directly to your employees and contractors which are then automatically corrected and stored in the system. View rates and points and company details of the companies you connect with and e-sign a security agreement which we store for you for easy retrieval.

You may also take advantage of other ACI tools such as the AutoRouter, door to door routing tool for quoting shipments quickly and easily.

- On the Connect form, If you are an IAC, you will see a list of Authorized Representatives to connect with. Authorized Representatives, on the other hand, will see a list of IACs to connect with.
- Using the ACI Gateway, you may send a connection request to only those companies you wish to connect with. Simply click on the **Send Request** link. When you request to connect you will send a security agreement with the request.
- A Green color indicates you are already connected, with that company. Yellow are pending requests that are not yet confirmed, and red are those companies you have not yet requested to connect with. If a company send a connect request to you, you will receive a link in your email in order to accept or decline it.
- If there is a carrier or IAC you do not see in our list simply click on ADD Carrier or ADD IAC. Carriers may send any IACs they add their STA (Security Threat Assessment) data.
- Once you accept a connection request sent to you, or your request is accepted by another company, you will be able to print a signed agreement .
- An important aspect of the Gateway is the ability to share and store STA data. Your information is only shared with those you connect with and vice versa. Under the STA column, you will find the download link for each company. The data here is the Employee STA information. Click to save this to you computer to then upload to the Indirect Air Carrier Management System (IACMS).

When you join the Gateway community, the Initial Set Up is easy. Simply enter your Corporate or Headquarters information, and then add any location stations that you have.

- The next step is enter your employees at each location. You may upload any documents such as the STA application that you would like to store for your employee records
- A great time-saving feature—the gateway gives you the ability to send a password protected exam via email directly to your employee. Exams will be automatically corrected and the result will be updated directly to the Gateway.

Hi Greg Voltattorni,

Please Click the link below to complete an exam for Indirect Air Carrier- Authorized Representative Training.

www.aircargocommunities.com/profile/exam/index/MToxNTA3Mw%3D%3D

Your password to access this exam is 19CA14

If clicking the link doesn't work, you can copy and paste the link into your browser's address window, or retype it there.

Best Regards,
Air Cargo, Inc.
