

# ACI COMPLIANCE GATEWAY

**The ACI Gateway is your inside network for those mandated to use the Indirect Air Carrier Standard Security Program (IACSSP).**

**The ACI Gateway provides a management tool for the air freight industry participating in IACSSP. Our platform makes the burden of TSA compliance more manageable.**

Welcome to The ACI Compliance Gateway, an easy-to-use system for maintaining and exchanging TSA compliance information.

Indirect Air Carriers—ACCESS CARRIERS INFORMATION FOR TSA COMPLIANCE

Authorized Representatives—connect with IACs you want to do business with

**SAVE TIME AND STREAMLINE THE PROCESS**

The ACI Gateway provides a simple dashboard for the purpose of sharing TSA and other company data with companies you connect with. The system eliminates hours of double entry and emailing files. It is secure and the data is backed up to our dedicated server.

With the Gateway, you can store your employee TSA compliance records and share them with companies you connect with. From the employee module, you may email password protected electronic exams directly to your employees and contractors, which are then automatically corrected and stored in the system. View rates and points, company details of the companies you connect with, and e-sign a security agreement which is stored for your easy retrieval.

You may also take advantage of other ACI tools such as the AutoRouter, and door to door routing tool for easy and quick quoting of shipments.

- On the Connect form, if you are an IAC, you will see a list of Authorized Representatives to connect with. Authorized Representatives, on the other hand, will see a list of IACs to connect with.
- Using the ACI Gateway, you may send a connection request to only those companies you wish to connect with. Simply click on the **Send Request** link. When you request to connect you will send a security agreement with the request.
- A Green color indicates you are already connected, with that company. Yellow are pending requests that are not yet confirmed, and red are those companies you have not yet requested to connect with. If a company sends a connect request to you, you will receive a link in your email in order to accept or decline it.
- If there is a carrier or IAC you do not see in our list, simply click on ADD Carrier or ADD IAC. Carriers may send any IACs they add, their STA (Security Threat Assessment) data.
- Once you accept a connection request sent to you, or your request is accepted by another company, you will be able to retrieve a signed agreement.
- An important aspect of the Gateway is the ability to share and store STA data. Your information is only shared with those you connect with and vice versa. Under the STA column, you will find the download link for each company. The data here is the Employee STA information. Click to save it to your computer, and then upload it to the Indirect Air Carrier Management System (IACMS).

- When you join the Gateway community, the Initial Set Up will be completed by ACI office administrator with the information you provide. Please note you will not be able to complete or modify any information on your end.

Once you receive an email that your account is ready, simply check if the corporate information and location info are listed as requested.

- The next step is entering your employees at each location. You may upload any documents such as the STA application that you would like to store for your employee records.

- A great timesaving feature: the gateway gives you the ability to send a password protected exam via email directly to your employee. Exams will be automatically corrected, and the result will be updated directly to the Gateway.

**IR CARGO, INC.**

Hi Greg Voltarnoni,

Please Click the link below to complete an exam for Indirect Air Carrier- Authorized Representative Training.

- Upload documents to store information on your employees and contractors.
- Only with your master user credential, you may grant an authorized STA employee permissions to one or more of your locations. Permissions are read only or read and write.
- Once you login, you will immediately be able to see any unread messages in your Alerts tab. Alerts may include companies you are connected with, who have altered their STA data, or who have an employee that has fallen out of compliance. You will also receive alerts when your employees need to be sent an annual exam or when an employee STA number is about to expire. There is also a tab listing any of your Employees that have fallen out of compliance.

The ACI Gateway serves as a secure compliance gateway for Indirect Air Carriers and Authorized Representatives. The Gateway reduces hours of tedious data entry and headaches, provides a platform for exchanging data securely, and for building solid business relationships.

IACs are bogged down with TSA updates and security agreements, which cuts into their profitability time. The Gateway manages these tasks and offers a direct way to develop new business relationships with agents.

## HIGHLIGHTS

1. Secure System to maintain and share data with ease.
2. Share data only with companies you connect with.
3. Invite employees to take STA exams electronically.
4. STA exams are scored automatically, and the exam score is added to your Exams tab.
5. Receive alerts when your employees are near or past their exam dates.
